Approximate Invasive Species Locations

 -  Amur honeysuckle (*Lonicera maackii*)
 -  Black locust (*Robinia pseudoacacia*)
 -  Canada thistle (*Cirsium arvense*)
 -  Common Reed (*Phragmites australis*)
 -  Common buckthorn (*Rhamnus cathartica*)
 -  Cut-leaf teasel (*Dipsacus laciniatus*)
 -  Garlic Mustard (*Alliaria petiolata*)
 -  Morrow's honeysuckle (*Lonicera morrowii*)
 -  Multiflora rose (*Rosa multiflora*)
 -  Purple loosestrife (*Lythrum salicaria*)
 -  Ragweed (*Ambrosia* spp.)
 -  Reed manna grass (*Glyceria maxima*)
 -  Smooth Buckthorn (*Rhamnus frangula*)
 -  Tartarian honeysuckle (*Lonicera tartarica*)

Note:
 Invasive species location data was recorded from field survey work and notes. Invasive species data points are approximate locations only and do not depict the true to scale locations of the targeted invasive individual.
